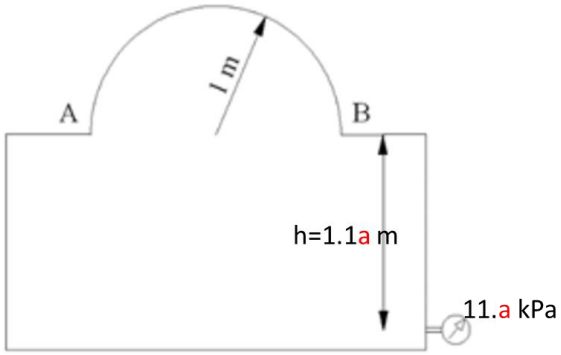
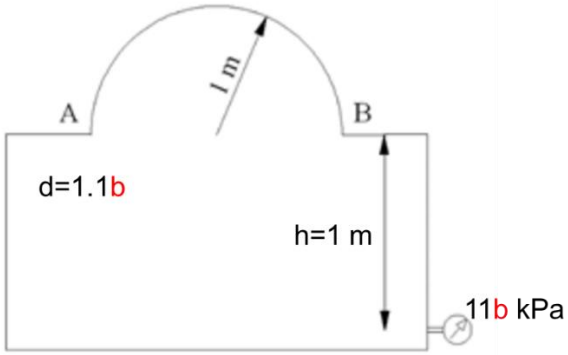
2020-2021 SPRING SEMESTER FLUID MECHANICS MIDTERM, Date:26/04/2021

Name: **Surname:** **Student ID:**

Question 2 (24p):

a) **(4)** Determine, if exist, the unit resultant force of water acting on the AB cylindrical surface shown in the figure. (γ_{water}=10kN/m^3)
(a= is the last digit of your student ID number)





b) **(20)** Determine the unit resultant force acting on the AB cylindrical surface shown in the figure. The specific gravity (SG=d) of the liquid filling the pressurized tank is given as 1.1b
(b= is the last second digit of your student ID number)
